Do you know DINA?

IO.T SOLUTIONS
A TEORESI GROUP COMPANY

DINA Connecting Spaces

DINA is Teoresi's **software platform** designed for facility managers, aimed at monitoring and analyzing energy consumption and people flows within buildings, **optimizing resources and space access.**

DINA operates on a **SaaS** (Software as a Service) model, making the world of Smart Buildings more efficient and user-friendly, even for end users.

THE WORLD OF DINA

DINA **saves time and money** with quick features like fast booking and QR code check-ins. It also reduces energy waste. With its **intuitive interface**, DINA provides support with quality and consistency, from installation to training. It keeps you informed in real-time about service efficiency through **reporting plans** and data visualization tools.

PERFECT FORMULA

DINA's offering is structured around **three service plans**, tailored to different needs and levels of complexity.

You will find the **essential features** for managing the time and space of your business while uncovering new possibilities you never realized you needed

Explore all the potential and features of the platform: contact us to discuss and find the formula that best suits your needs.
